⚠ *Safety Information*

The following note has been added after "■ Be careful with laser beam.".

Addition:

■ Do not touch the SFP-T transceiver during operation or just after operation has stopped.
● During operation, the temperature of the SFP-T transceiver can rise to 65ºC, as when a link is being established. Do not touch the SFP-T transceiver while it is operating and just after it has stopped. Doing so could result in burns.

High-temperature warning
(During operation, all surfaces, including the top, bottom, and the sides, are hot.)

To remove the SFP-T transceiver, use the procedure below. Failure to do so could result in burns.
- To remove the SFP-T transceiver while the Switch is on, execute the `inactivate` command, and then wait 5 minutes before removing the SFP-T transceiver.
- To remove the SFP-T transceiver while the Switch is off, turn off the Switch, and then wait 5 minutes before removing the SFP-T transceiver.
The following label is attached to the SFP-T transceiver.
